

Northwind Traders - Annual Business Report FY2026

Executive Summary

Northwind Traders delivered a strong fiscal year 2026, with net revenue growing 14 percent year-over-year to 82.4 million dollars. Growth was driven primarily by the expansion of our subscription-based logistics platform, which now serves over 3,200 enterprise customers across North America and Europe.

Financial Performance

Gross margin improved from 41 percent to 46 percent, reflecting cost efficiencies in our warehousing network and a shift toward higher-margin software services. Operating expenses increased by 9 percent, largely due to continued investment in our engineering and customer success teams.

The company ended the fiscal year with 28.1 million dollars in cash and cash equivalents, and no outstanding long-term debt.

Regional Performance

- North America: 51.2 million dollars in revenue, up 11 percent.
- Europe: 24.7 million dollars in revenue, up 22 percent.
- Asia-Pacific (new market entry): 6.5 million dollars in revenue.

Outlook for FY2027

Management expects continued double-digit revenue growth in FY2027, driven by the planned launch of an AI-powered route optimization add-on and further expansion into the Asia-Pacific region. The board has approved a share buyback program of up to 5 million dollars over the next twelve months.
